

Multi-GPS Tracker

C20T

Patent Design

Feature

- **Hidden Professional GPS Tracker** with 2200mAh Li Battery
 - Instant call alert for anti-theft when vehicle motion and break-out is detected
 - GSM+GPS positioning with Google map tracking
 - Remote Sound Monitoring function enables user to hear all in-car conversation clearly
- **Multi Car Adaptor**
 - Battery Checker to display the Voltage of car battery on LED
 - 2 USB Output with 3.1A
 - 180W with 2 Cigarette Lighter
 - Auto-recovery fuse
- **Car Monitor** via sound and vibration enables user to monitor the in-car situation all the time. Every year, numerous children die because of heat stroke from being left in parked cars. Car monitor is an ingenious solution for giving vehicles an added layer of safety for protecting children.

Tracker Build-in

with 2600mAh battery

Cross-platform Tracking Software

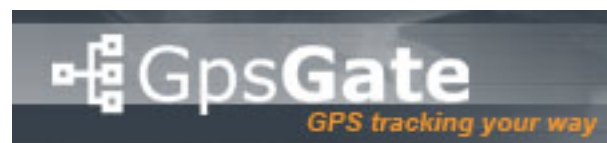

Website

WeChat

IOS

Android

Compatible with third party platform

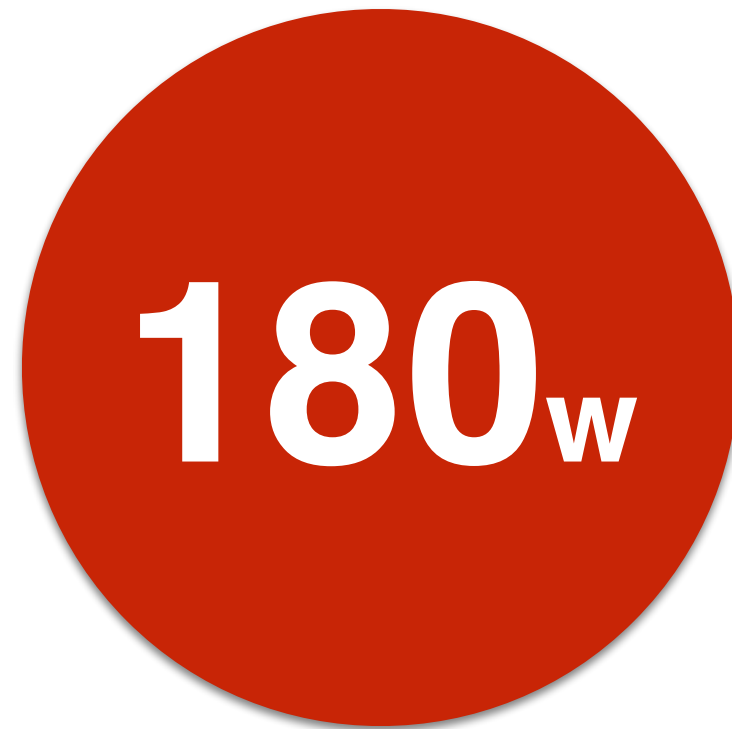

Car battery checker

with Dual USB 3.1A output

Highest Power

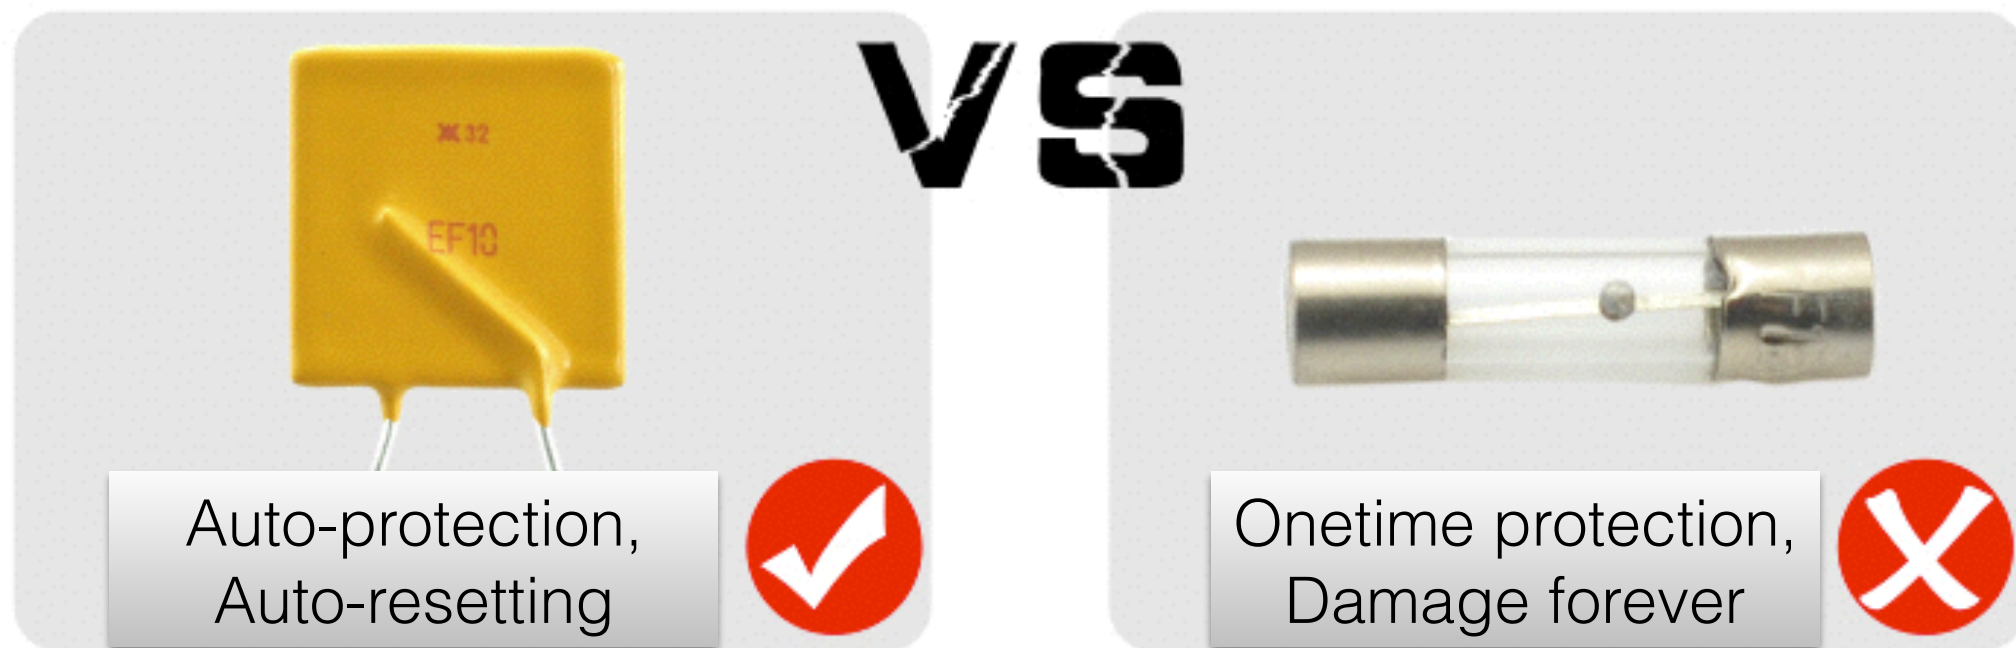

in the market

180_w

Self-resetting Fuse

it will automatically cut off and recover when detecting over power occurred

Quality Competent

Design and quality are specially made to support the high-power car adaptor

Support cigarette lighter

Original cigarette lighter works well

Specification

- Input Voltage: DC 12-24V
- Input Current: without load: 15mA MAX, with load: 1.8A MAX
- output voltage: without load: DC 5.0V-5.4V, with load: DC $\geq 4.75V$
- USB output current: 3100mA MAX
- USB Output Ripple Noise: 200mV MAX
- Input Protection:
 - There is a Self-resetting 3A safety fuse installed, and it will automatically cut off and recover when detecting over power occurred.
- Output Protection:
 - Both input and output power will be limited when short circuit occurs, and system will resume to the normal charging state automatically afterward.
