

# Keychain GPS Tracker

T510

# Feature

- One of the smallest portable GPS+WiFi Tracker, and it can be used as a keychain
- Perfect tiny tracker for purse, handbag, luggage or keys
- Panic button built-in, perfect security device for lady and kids
- 700mAh lithium polymer rechargeable battery
- Size: 51.4x41.5x13.5mm
- SIM card will be pre-installed in the device before shipping to end user
- WiFi version is an option to be selected

## WiFi Option

### WiFi FindMe

Precision active indoor tracking technology, even without GPS and WiFi signal, system is still able to broadcast WiFi signal as a WiFi hotspot, so user can detect the signal strength via app to approach the device.

It is very helpful for user to get close to the device indoor

### WiFi Location

The tracker will scan the nearby WiFi router signal and get the address from the Google database.

This tracking mode works even indoor and accuracy is around 10-100 meters.

### WiFi Fence

User can setup specific WiFi hotspot coverage as a fence, alert will be triggered when device enter or exit the fence.

WiFi fence comparably smaller coverage, but much better accuracy and stable than the regular geo-fence.
