- Panic button built-in, perfect security device for ladies, seniors and kids
- Support indoor tracking with LBS or WiFi position technique
- With silicone belt holder to hide the tracker on the belt
- Custom design silicone case is welcome
- WiFi version is an option to be selected

## WiFi Option

### WiFi Location

The tracker will scan the nearby WiFi router signal and get the address from the Google database.

This tracking mode works even indoor and accuracy is around 10-100 meters.

### WiFi Fence

User can setup specific WiFi hotspot coverage as a fence, alert will be triggered when device enter or exit the fence.

WiFi fence comparably smaller coverage, but much better accuracy and stable than the regular geo-fence.
