install into the vehicle with  
12V/24V input

# for Parcel

Easily to be put inside the parcel and keep monitoring

# Safe Alarm

Call your cellphone immediately when someone try to steal your safe

## WiFi Option

### WiFi Location

The tracker will scan the nearby WiFi router signal and get the address from the Google database.

This tracking mode works even indoor and accuracy is around 10-100 meters.

### WiFi Fence

User can setup specific WiFi hotspot coverage as a fence, alert will be triggered when device enter or exit the fence.

WiFi fence comparably smaller coverage, but much better accuracy and stable than the regular geo-fence.
