 - 700mAh lithium polymer rechargeable battery
 - Maximum 15 working days

WiFi Option

WiFi Location

The tracker will scan the nearby WiFi router signal and get the address from the Google database.

This tracking mode works even indoor and accuracy is around 10-100 meters.

WiFi Fence

User can setup specific WiFi hotspot coverage as a fence, alert will be triggered when device enter or exit the fence.

WiFi fence comparably smaller coverage, but much better accuracy and stable than the regular geo-fence.

Size

Step1:
