

## Brief User Guide of Software Upgrade

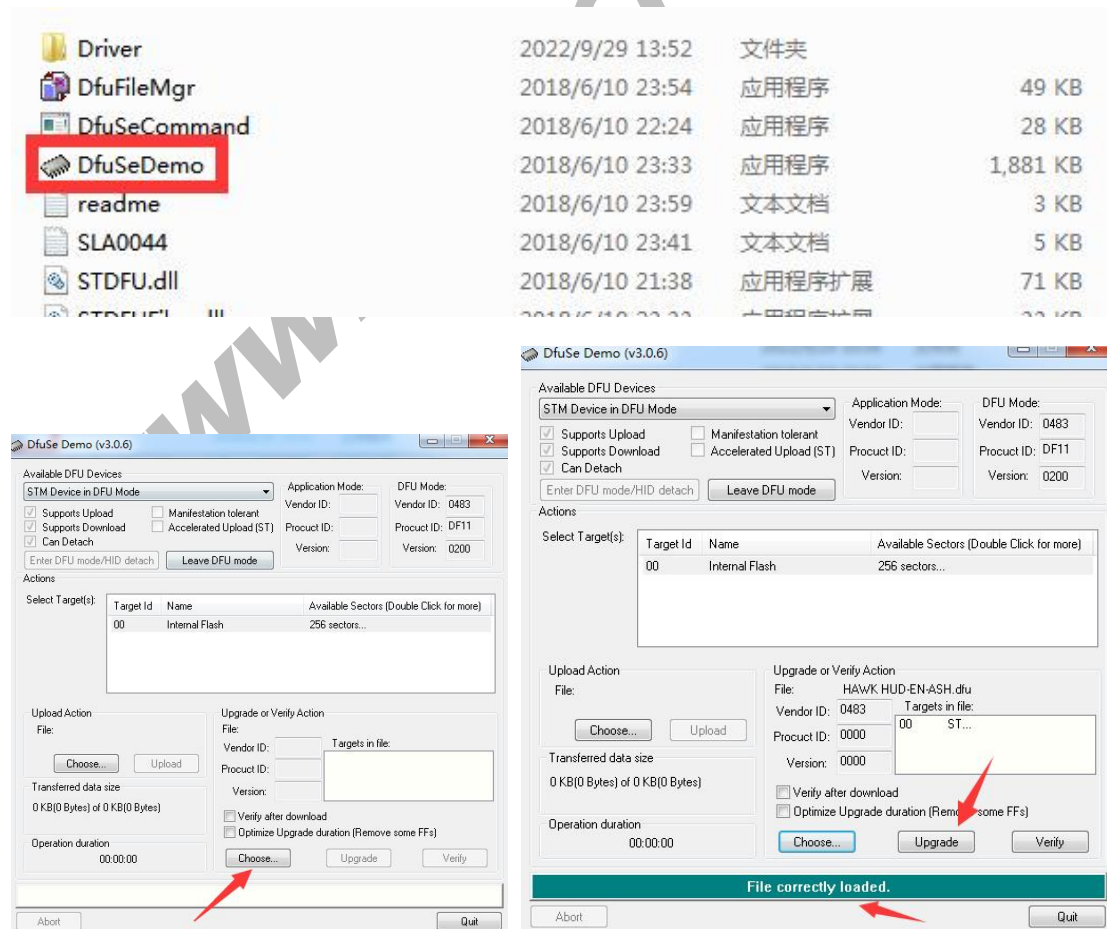

**Step 1:** please check the correct language version of V60 HUD at your hand.

**Step 2: Long press device LEFT button and hold**, connect the USB cable to computer, you will see device interface is black with white fonts (loose your hand to press the button)

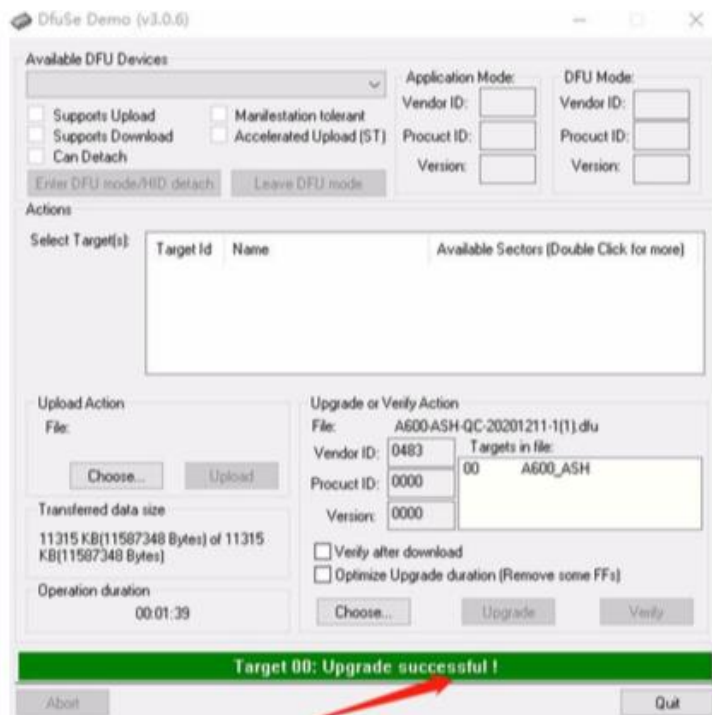

**Step 3:** Check your computer system and install the relative driver.

**Step 4:** Open the program "DfuSeDemo.exe" as below, and click "choose" to choose "V60-EN-ASHdfu.dfu" file, then click "upgrade".

**Step 5:** once upgrade successfully, you can see below interface and device is on automatically:

**Step 6: Reboot the machine as below steps:**

If the screen is colorful after upgrade software successfully, please don't unplug the HUD from computer, need to reboot the machine; press the left button for 8 times; later press the right button for 8 times; finally press the middle "OK" button one time, then the machine will reboot. ( If the screen is normal, then ignore this step).

**Step 7: Connect the HUD to your car to check again.**
