

## Brief User Guide of Software Upgrade

**Step 1:** please check the correct language version of V60 at your hand.

**Step 2:** Install application of Vjoycar\_v60\_a500 on your computer and run it:

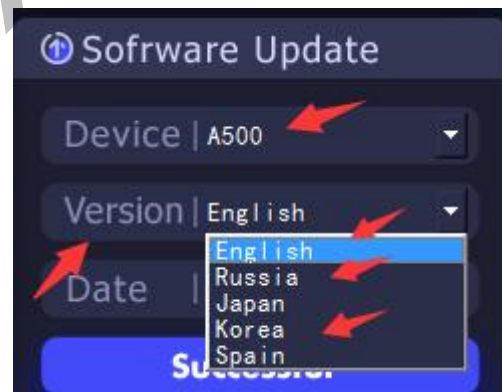

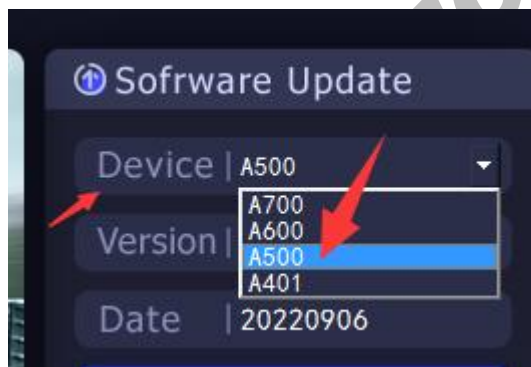

**Step 3: Long press device LEFT button and hold**, connect the USB cable to computer, you will see device interface is black with white fonts (loose your hand to press the button)

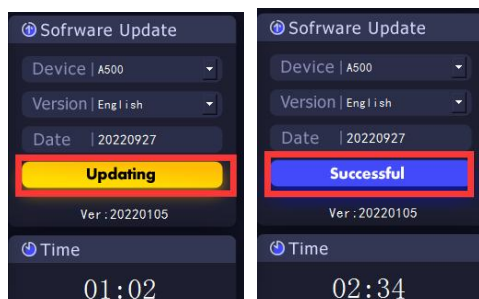

**Step 4:** Choos correct model software at the right column:

V60 → choose A500;

Notice: Choose the software version of same language as your original HUD, can't choose a different language;

**Step 5:** When software is updating, it will show in yellow; once upgrade successfully, you can see below interface and device is on automatically:

**Step 6: Reboot the machine:**

Upgrade software successfully, wait a couple of seconds, the screen will come to normal display interface, not white fonts with black screen any more.

If want more than 2 minutes, white fonts with black screen, then please check whether you chose wrong mode and language when you update the software, please re-update software again.

**Step 7: Connect the HUD to your car to check again.**
